OUTLAW_x

PUSHING BOUNDARIES

**"[The Outlaws] are fantastic... like a whole new way to ski, and I am totally psyched."
- Chris Kovaly**

**"This binding has definitively changed the way I ski... I am telemarking pitches on the Outlaw that used to kick my butt"
- Judd Goldberg**

"I love their performance, their ease to step into and release, I love almost everything about them." - Whitney Foehl

"These bindings are awesome! You can really lean into them... I've experienced frustrating snow build up with [other NTN's], but no problems so far with the Outlaws." - Simon Logan

OUTLAW_x

**"Downright enviable
tele performance –
smooth, solid, satisfying"**

**-Craig Dostie,
Earnyourturns.com**

The OUTLAW_x is our updated NTN binding now with easier step in and exit, lighter weight, improved durability, and a lower price. Still built the 22Designs way with sweet flex, copious spring travel, rugged steel construction, and blazing up and down hill performance.

An underfoot spring steel plate allows a lively flex without sacrificing lateral rigidity. A long spring provides smooth travel, and an easy adjustment system makes it quick to find the sweet spot.

Borrowing proven touring technology from the Axl, the Outlaw_x delivers true free-pivot performance. With a simple step in and pole activated release, the Outlaw_x is always ready to run.

- easier to step in and out
- improved durability for the hardest chargers
- even more spring travel
- now lighter: weight including climbers:
Large: 3lbs 9oz / 1620g
Small: 3lbs 6oz / 1545g,
- new, lower \$399.95 US retail price
- instant flex engagement
- optional brakes: 95, 110 & 125mm widths
- 50 degrees of resistance-free touring
- preload adjustable from 1 to 5
- spring-loaded climbing bail
- NTN compatible in two sizes: Size break for Scarpa and Crispi boots is 26.0/26.5. For Scott/Garmont boots, the break is between 25.5 and 26.0
- toe piece height: 1.2" at rear with 5° ramp

AXL

**"This is THE
binding for
maximum
downhill
performance
and touring
efficiency."**

-Backcountry Magazine

The Axl is the performance standard in 75mm free-pivot telemark bindings. A six-hole mounting pattern and burly stainless construction make it the binding to perform on & off piste with dependability you can trust.

- choose from three pivot points to customize your flex
- size small for mondo 25.5 & under, size large for 26.0 & up
- weight including climbers:
Large: 3lbs 15oz / 1790g
Small: 3lbs 13oz / 1720g,
- over two inches of spring travel
- mil-spec cables with 2000lb fittings

**All 22 Designs Bindings
are 100% made in the USA
with a 2 year warranty and the
same secure 6 hole mounting pattern.**

VICE

"Resort-crushing construction."

-Backcountry.com

The VICE is the standard for 75mm lift-serve skiing. Borrowing quality & design traits from both the HammerHead and AXL, it's a simple, solid performer.

- solid toe piece construction
- choose from three pivot points to customize your flex
- size small for mondo 25.5 & under, size large for 26.0 & up
- weight:
Large: 3lbs 2oz / 1430g
Small: 3.0 lbs / 1360g,
- over two inches of spring travel
- mil-spec cables with 2000lb fittings

Our latest designs on hats, hoodies, t-shirts and more schweg available at twentytwodesigns.com
